

## Instruction for Authors

### Guide for authors

As an international, multi-disciplinary, peer-refereed journal, Learning and Instruction provides a platform for the publication of the most advanced scientific research in the areas of learning, development, instruction and teaching. The journal welcomes original empirical investigations. The papers may represent a variety of theoretical perspectives and different methodological approaches. They may refer to any age level, from infants to adults and to a diversity of learning and instructional settings, from classroom to informal learning. They may rest on the full spectrum of established methodologies, from laboratory experiments to field observations. The major criteria in the review and the selection process concern the significance of the contribution to the area of learning and instruction.

### Contact details for submission

Authors are requested to submit their papers electronically by using the Learning and Instruction online submission and review web site ( <https://www.ejsei.com/profile/#/JLI/login> ). This site will guide authors stepwise through the submission process. Authors are requested to submit the text, tables, and artwork in electronic form to this address. Authors who are unable to provide an electronic version or have other circumstances that prevent online submission must contact the Editor prior to submission to discuss alternative options; email: [jli@elsevier.com](mailto:jli@elsevier.com). The Publisher and Editor regret that they are not able to

consider submissions that do not follow these procedures.

### Submission checklist
